PROFESSIONAL SUMMARY

Interim Senior Technology Lead with 10+ years of experience in fintech platforms, payment gateways, full-stack engineering, and technical delivery leadership. Combines technology leadership with hands-on project management as the primary Scrum Master across delivery initiatives. Partners with executive leadership on product discovery, system design, vendor evaluation, and AI-enabled product strategy while guiding teams from feasibility through delivery.

TECHNICAL & LEADERSHIP SKILLS

Leadership & Delivery: Technology Strategy, Technical Roadmaps, Product Discovery, Agile Scrum, Scrum Mastery, Project Management, Stakeholder Management, Vendor Evaluation, Developer Mentorship

AI & Product: Generative AI, Large Language Models (LLMs), Conversational AI, Voice/Chatbot Architecture, Open-Source AI Evaluation, AI Governance

Engineering: Python (FastAPI, Flask, Django), TypeScript (Hono, Drizzle ORM), Go, Vue.js, Nuxt.js, PostgreSQL, MySQL

Platforms & Operations: Payment Gateways, ACI Worldwide, PaymentPlug, CelerisPay, NORBr, SEON, Nethone, DigitalOcean, Continuous Integration/Continuous Delivery (CI/CD), Test Automation

PROFESSIONAL EXPERIENCE

Payreto Services Inc. | Makati, Philippines

Interim Senior Technology Lead | June 2026 – Present

- Partner directly with the Chief Executive Officer (CEO) on product discovery, shaping problem statements, evaluating opportunities, and translating findings into technical direction and delivery priorities.
- Serve as the primary Scrum Master and technology lead across projects, driving sprint planning, prioritization, delivery tracking, risk management, and stakeholder alignment.
- Established a scalable delivery operating model by delegating day-to-day project coordination to the Project Manager/Scrum Master while retaining strategic oversight, technical guidance, and delivery accountability.
- Led feasibility assessment and high-level system design for an AI voice and chatbot product using open-source technologies, evaluating architecture, integration patterns, operational requirements, and delivery risks.
- Evaluate external vendors for the Envision AI voice/chatbot product and represent technology in IT vendor discussions, including the assessment of Jira Service Management for company-wide support operations.

Technology Lead | January 2026 – May 2026

- Provided technical governance, architecture strategy, and product alignment across enterprise payment configurations and internal platforms.
- Acted as the primary Scrum Master and technical lead for project delivery, facilitating Agile ceremonies, removing delivery blockers, and translating stakeholder needs into actionable engineering work.
- Directed cross-functional product development teams, strengthening code review, security, deployment, and delivery practices.
- Oversaw delivery for an internal disbursement tool supporting high-volume corporate payouts and secure multi-ledger workflows; drove organizational AI adoption and drafted the company-wide AI governance policy.

Technology Lead (Interim) | January 2025 – December 2025

- Served as both interim technology lead and primary Scrum Master, guiding payment-gateway architecture, sprint execution, and engineering delivery through a critical business leadership transition.
- Maintained deployment reliability, integration quality, and engineering compliance standards while connecting senior stakeholder objectives to scalable implementation plans.

Client Solutions Specialist | October 2022 – January 2025

- Led design and development of an internal payment-gateway testing tool that streamlined end-to-end integration cycles.
- Architected and launched a centralized hiring tracker, improving applicant workflow coordination between Human Resources and technical leads.
- Built and enhanced high-availability internal microservices with Python, TypeScript, and Vue.js; automated manual operational procedures to reduce errors.

Payment Gateway Specialist | May 2019 – October 2022

- Administered and tuned international transaction gateways supporting multi-currency, cross-border accounts and secure vendor integrations.
- Diagnosed production infrastructure issues and maintained transaction-processing availability against defined service-level expectations.

TELUS International Philippines | Ortigas, Philippines

Network Support Analyst | October 2016 – May 2019

- Provided network infrastructure diagnostics and technical support for field technicians delivering complex telecommunications setups.
- Improved ticket resolution through efficient triage, documentation, and routing of infrastructure incidents.

Convergys | Philippines

Technical Support, Reporting & Data Management | 2011 – 2016

- Delivered end-user support, database diagnostics, transactional troubleshooting, data-integrity validations, and reporting audits.

Department of Environment and Natural Resources (DENR) | Philippines

Records Officer (On-the-Job Training) | Summer 2011

- Sorted and organized land titles and official records to support accurate filing, retrieval, and records management.

EDUCATION

Bachelor of Science in Computer Science | Bohol Island State University | 2013

CERTIFICATIONS

Ultimate Agile Scrum Master Certification — Udemy (2025) | Python Django: The Practical Guide — Udemy (2024) | Become a Product Manager — Udemy (2024) | Figma UI/UX Design Essentials — Udemy (2023) | TESDA Computer Hardware Servicing NC II (2010)

ADDITIONAL INFORMATION

Open Source & Personal Development: Build and maintain engineering tooling; several personal projects have evolved into internal production solutions. Technical interests include systems automation, process parallelization, infrastructure optimization, and developer productivity.
